

OR-T Serie

BATTERY HAND TOOLS FOR PLASTIC STRAPPING

WITH NEW EASY TRIGGER TECHNOLOGY

ADVANCED ERGONOMICS

✓ For increased efficiency and usability

- Intuitive and simple user interface
- Balanced design for easy operation
- Quick to learn and use

HIGH PERFORMANCE

✓ For enhanced power and productivity

- Maximum control through fine adjustment of the tension force, tension speed and welding
- Optical control element for correct strap insertion
- Latest AMPShare® battery generation

RELIABLE QUALITY

✓ For more consistent operation

- High quality components
- DEKRA-tested and certified
- Swiss made

The next generation battery Hand Tool for plastic strapping – OR-T 140, OR-T 270 and OR-T 460 – with the new Easy Trigger Technology, can take your operations to a higher level. The advanced technologies and ergonomic design of the new OR-T Hand Tools fit into your advanced packaging process.

OR-T 460

for heavy-duty application,
16–19 mm

OR-T 270

for universal application,
13–16 mm

OR-T 140

for easy application,
9–13 mm

Powered by BOSCH

Simplified strapping process

The Easy Trigger Technology activates the strapping process with a simple finger pull to insert and remove the strap. This simple process and optimized tool balance reduces operator fatigue and makes the operation easier, regardless of the strapping application.

Increased productivity

Increased efficiency due to the unique, ergonomic handling and advanced performance of the latest AMPShare® battery generation from BOSCH®.

Enhanced reliability

High-quality materials, including wear parts, meet the highest quality standards and are made of heat-treated tool steel or powder metallurgical material.
